Available from early 2027, on completion of my JSPS postdoctoral fellowship at NII. Seeking academic or industry research positions in 3D computer vision, geometric deep learning, and shape analysis.

Work experience

- Postdoctoral Researcher in 3D Computer Vision

From Feb. 2026 to Jan. 2027 [National Institute of Informatics \(NII\)](#) Tokyo, Japan

Computer Vision and Discrete Geometry Group
- Temporary Teaching and Research Assistant (ATER)

From Sept. 2024 to Aug. 2025 [IUT GON - MMI](#) Saint-Lô, Fr

Education

- PhD in Computer Science and Artificial Intelligence

From Dec. 2021 to Oct. 2025 [University of Caen Normandy & Ibn Tofail University](#)

Caen, France & Kenitra, Morocco

GREYC Laboratory, SAFE Team

SETIME Laboratory TIIA Team
- Specialized Master's Degree in Embedded Electronics

From Sept. 2018 to Dec. 2020 [Faculty of Science, Ibn Tofail University](#) Kenitra, Morocco
- Bachelor's degree in Physics

From Sept. 2014 to July 2018 [Faculty of Science, Ibn Tofail University](#) Kenitra, Morocco
- University Diploma of Technology (DUT)

From Sept. 2012 to July 2014 [The Ecole Supérieure de Technologies](#) Fes, Morocco

Stream: Electrical Engineering

Option: Electronics and Industrial Computing
- Baccalaureate

From Sept. 2011 to July 2012 [Ibn Sina Technical High School](#) Kenitra, Morocco

Electrical Science and Technology course

Research Focus

Areas of Expertise

- 3D Mesh Quality
- 3D Mesh Visual Saliency
- Artificial Intelligence
- Graph Neural Networks (GNNs)

Strong Interests

- Geometric Deep Learning: Graph Processing.
- Computer Vision in Robotics.
- Image Processing for Healthcare Applications.
- Multi-Modal Strategies.

Conferences, seminars and workshops

- **First Prize, BR41N.IO DESIGNERS' HACKATHON**
Oct. 2024 [IEEE SMC 2024 Conference](#) Kuching, SRW, Malaysia
Racing Game with EEG Control
Developed a Unity-based racing game controlled via EEG signals using the Unicorn Hybrid Black and Unicorn Unity Interface. Focused on real-time signal integration and gameplay interaction.
- **Participation in the Hackathon on the use of artificial intelligence in education**
Jan. 2024 [DyslexAI, Al Akhawayn University](#) Ifran, Morocco
Design of a video game using artificial intelligence to help dyslexic children overcome confusion between letters, as well as inclusive learning difficulties.
- **Participation in the week SEEDS@MaDICS**
Mar. 2023 [MaDICS, University of Technology of Troyes](#) Troyes, France
Proposal of a method to take measurements of a person from the 3D scan of his body.
- **Communication and participation in conferences and workshops**
Sept. 2022 [The 1st Edition of the Multidisciplinary Doctoral Days](#) Kenitra, Morocco
Presentation on Evaluating the Visual Quality of 3D Meshes Without Reference to Convolution Networks

Scientific mediation

- **Meeting with a researcher**
Oct. 2022 [Fête de la Science](#) Soliers Library, France
- **Does the addition of 3D in video games make your experience more realistic?**
May 2023 [Pint Of Science](#) Caen, France

Collective responsibilities

- **President and founder of the Doctoral College of the SETIME Laboratory**
From July 2021 to Feb. 2024 [Faculty of Sciences of Ibn Tofail University](#) Kenitra Morocco
Organization of the SETIME Laboratory days, trainings and workshops for the benefit of doctoral students and students of the university.
And member of the Board of the SETIME Laboratory.
